

2010 CLUBHOUSE TRAINING SYLLABUS

Research

The Program for Clubhouse Research was created in January 2000 through an affiliation between the University of Massachusetts Medical School and the International Center for Clubhouse Development (ICCD). Its purpose is to develop and support an international research agenda and to increase the quality and quantity of research on the Clubhouse Model of Psychiatric Rehabilitation.

The Program for Clubhouse Research provides a number of functions including acting as a clearinghouse for clubhouse research with the capacity to provide effective communication, dissemination of information, and assistance to clubhouses and researchers considering participation in clubhouse related research projects.

For more information regarding Clubhouse research activities see <http://iccd.org/base.asp?SectionID=7> or contact Colleen McKay, M.A., C.A.G.S. at colleen.mckay@umassmed.edu.
